The Art of Becoming a Good General Practitioner

Look at the whole patient (it's not just a disease)

Understand the dreams and fears of your patients

Be curious

We have 2 ears & 1 mouth (use them in this proportion)

Know your community

Meet the patient eye-to-eye

Broaden your horizon; look over the edge, form teams.

Learn to manage uncertainty; don't be afraid to ask for help

Trust in what you have learned

Keep up-to-date

Empathy and compassion
